Introduction

Welcome to the SPSS Library. Since most people have found that short videos are the best way to learn SPSS, the video resources are listed first. Simply click on the link to go to the YouTube-based video. Also included below is a web-based text resource for those who prefer text.

**Please note** Many of the videos use slightly older versions of SPSS or may use Mac or Windows, but that is not a problem. The basic functions of SPSS are the same across versions and platforms, whether Mac or Windows.

Videos

1. SPSS for Beginners 1: Introduction
2. SPSS for Beginners 2: Frequency Counts and Descriptive Statistics
3. SPSS for Beginners 3: Coorelations
4. SPSS for Beginners 4: Regression
5. SPSS for Beginners 5: Z scores
6. SPSS for Beginners 6a: One-sample t-tests and Confidence Intervals
7. SPSS for Beginners 6b: Paired-samples t-tests and Confidence Intervals
8. SPSS for Beginners 6c: Independent-samples t-tests and Confidence Intervals
9. Working with SPSS: Multiple Regression (The Simple Way)
10. Working with SPSS: Importing Data from Excel
11. Working with SPSS: One-Way Analysis of Variance (ANOVA)
12. Working with SPSS: Other resources
